Career Objective|

Motivated and detail-oriented Computer Science graduate with strong programming and problem-solving skills. Eager to start a career in software development and contribute to innovative projects while continuously enhancing technical expertise.

Education

B.Tech in Computer Science & Engineering
Drs. Kiran and Pallavi Patel Global University
CGPA: 8.1 / 10

Technical Skills

- Languages: C, C++, Java, Python
- Web Technologies: HTML, CSS, JavaScript, React.js
- Database: MySQL
- Tools: Git, GitHub, VS Code, Eclipse
- Subjects: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Projects

1. **Fake News Detection System** (ML + Flask)
- Built a machine learning model to classify news as real or fake using NLP.
- Deployed the project using Flask for real-time predictions.

2. **AI-Powered Language Translation (React.js+ OpenAI API Integration)**.

- Integrated the system with OpenAI to provide real-time translation via a web interface.

3. **Personal Portfolio Website** (HTML/CSS/JS)
- Designed and deployed a personal portfolio website showcasing skills and projects.

Certification

- edunet machine learning/artificial intelligence

Achievements & Activities

- Participated in coding contests and hackathons at college level.
- Member of Coding Club (2022–2025).
- Volunteered in organizing technical events during college fest.

Strengths

- Strong problem-solving and analytical abilities.
- Quick learner, adaptable to new technologies.
- Team player with effective communication skills.
